Introducing CutPRO®

CutPRO® is high performance, cut resistant work wear, designed to offer reliable, ultra-durable and thoroughly field-tested protection to professionals in the glass and metal industry.

Made from specialist fabric Cut-Tex® PRO, all garments offer outstanding levels of cut, tear, abrasion and puncture resistance, while being durable, lightweight and comfortable.

Used across the CutPRO® range, this highly acclaimed fabric provides the best possible defence against cuts and lacerations and withstands frequent laundering.

CutPRO® garments are made in the UK, fully CE certified and recognised by the BSIF, with a 6 month workmanship guarantee.

More information

- Cuts and lacerations can cause rapid blood loss, infection, permanent damage to soft tissues, and even death.
- Manual handling incidents cost firms time and money, they highlight a serious failure in employers' duty of care; possibly leading to reputation loss and criminal prosecution.
- Cheaper alternatives are likely to offer inferior protection, costing customers more in replacements while compromising safety.

CutPRO® Certifications and Associations

When reselling our products, be sure to mention the brand's certification and association status on your website and marketing materials to encourage buyer trust.

As our garments are fully CE certified, they can be resold in the European Union as Personal Protective Equipment (PPE) which meets EU standards for health, safety, and environmental protection.

As our garments carry the UKCA mark, they conform to UK standards of PPE.

The British Safety Industry Federation (BSiF) is the trade association for the Personal Protective Equipment (PPE) Regulation and has Primary Authority status with Trading Standards. As a BSiF registered safety supplier, our products and services are certified to meet the appropriate EU standard.

Brand Guidelines

When using our logo in your promotional materials, please ensure you only use the above versions. The white logo should only be used over block colours in graphics, whereas the orange can be used over images as well, and is our main logo. If you have any questions about best practice, please email press@cut-pro.com.

Garment Information - Care

- Do not use this product for protection from high speed or serrated blade
- Do not use this product near moving machines or where there is a risk of entanglement
- Do not use this product for food processing
- This product is designed to minimise the risk of injury from potential hazards in the industrial work space (abrasions, cuts, tears and puncture)
- This product is used only for the designated purpose, no item of PPE can provide full protection
- This product is not designed to protect the hands, gloves are to be worn when required
- This product does not protect from hypodermic needles or similar sharp pointed objects
- Care and attention must always be taken when carrying out potential hazardous activities
- Cut-Tex® PRO is an ultra-high performance cut resistant fabric. However, it is not completely cut proof.
- CutPRO® garments should be stored in a temperate dry environment.
- If you suspect aging or loss of performance with your product please contact us directly and email in photographic images.
- Do not attempt to repair CutPRO® Clothing garments yourself. Specialised PPE providers use specialist threads to stitch and sew garments.
- CutPRO® garments are not recyclable. For safe disposal please return your product to CutPRO® Clothing Ltd.

Maintenance

- Do not wear this product if damaged, always inspect prior to use
- Do not leave in a contaminated condition, launder immediately
- When not worn, store this product in cool dry conditions away from direct sunlight
- Wash dark colours separately
- Do not wash with fabric conditioner
- Reshape whilst damp

CutPRO® branded products can not be sold in Canada, please contact us for other available branding options.
