About CutPRO® Cut Resistant Clothing

CutPRO® is an innovative brand of cut resistant workwear designed to protect professionals in the glass and metal industries from manual handling injuries.

Our products take cut resistant clothing to a whole new level. Our specialist fabric, Cut-Tex® PRO offers outstanding levels of cut, tear, abrasion and puncture resistance, while being durable, lightweight and comfortable. Used across the CutPRO® range, it provides the best possible defence against cuts and lacerations and gives workers personal protection they will want to wear.

CutPRO® is the result of extensive research and contribution from health and safety professionals of leading flat glass and sheet metal processing companies. As such, we know that one garment certainly does not fit all.

Together with the department of apparel of one of the UK's top universities, we have designed a range of garments perfectly suited to the glass and metal industries, yet fully adaptable a firm's individual needs.

We work with customers to ensure clothing is tailored to their unique operational risks and needs, role responsibilities, and preferences. Each garment can be customised with breathable areas, high visibility, choice of cuffs and collars, and brand colours to ensure precise protection with optimum usability.

Why Choose CutPRO®?

- High quality cut resistant clothing is essential in glass and metal handling. Cuts and lacerations can cause rapid blood loss, infection, permanent damage to soft tissues, and even death.
- Not only do manual handling incidents cost firms time and money, they highlight a serious failure in employers' duty of care, which can lead to reputation loss, and even criminal prosecution.
- Cheaper alternatives are likely to offer inferior protection, costing you more in replacements and compromising safety.
- Not all cut resistant products offer high levels of tear, puncture or abrasion resistance: significant additional factors for safety.
- It is lightweight, comfortable and fully washable, making it a practical solution to personal protection.
- All CutPRO® garments can be customised to reflect unique operational risks and needs, role responsibilities, branding and design preferences.

About Cut-Tex® PRO

Cut-Tex® PRO

The Ultimate Cut Protection™

Cut-Tex® PRO is an ultra-high performance cut and slash resistant fabric, comfortable to wear, fully machine washable and of truly exceptional strength and durability - making it the ideal material for CutPRO® Cut Resistant Clothing.

As you can see below, Cut-Tex® PRO performs very highly in all cut, abrasion, tear and puncture tests:

Cut-Tex® PRO Performance Chart:

> **Cut Resistance** - ANSI/ISEA 2016 Blade Resistance Levels A1-A9

> **Abrasion Resistance** - EN 388:2016 Abrasion Resistance Levels 1-4

> **Cut Resistance** - EN 388:2003 (coupe test) Cut Resistance Levels 1-5

> **Tear Resistance** - EN 388:2016 Tear Resistance Levels 1-4

> **Puncture Resistance** - EN 388:2016 Puncture Resistance Levels 1-4

> **Cut Resistance** - EN ISO 13997 (TDM-100 Test)
